# House Cleaning

## REMINDER:

This Webinar is being Recorded  
Please Turn Off Cell Phones

# The Presenters

## Dale Henningson | Purkeys' Chief Engineer

---

Dale worked in his field for 20 years after getting a degree in electrical engineering from Utah State in 1994. He founded the company Quantum Ingenuities in 2004, which was awarded Business of the Year in 2012, before merging with Purkeys in 2014.

---

## Larry Rambeaux | National Truck & Fleet Representative

---

Larry has over 20 years' experience working with heavy duty fleets. He is an outstanding trainer and uses his extensive experience to help his customers make the best choices for their electrical needs.

---

# Questions Sent Before the Webinar

Are there benefits to using a DIRECT system? • Are there benefits to using a SELECT system?

Can I charge the batteries without adding stingers? • Can you upgrade/replace the complete system?

What do the LED indicators mean? • What parts are serviceable?

# Ask Your Questions

1

**TYPE**  
your questions  
in the Question  
field.

2

**PLEASE**  
Include your  
name and  
email.

## LIFTGATE CHARGING SYSTEMS

### PURKEYS' LIFTGATE CHARGING SYSTEMS, ELECTRIC LIFTGATE CHARGER

Severely discharged electric liftgate batteries are a regular problem for fleets. When the truck lift gate doesn't work, or it gets stuck in the middle of a lift, the truck can't move until the batteries are recharged.

Purkeys' liftgate charging systems can help avoid discharged batteries, resulting in happy customers and routes running on time. Purkeys' [DIRECT](#) and [SELECT](#) lift gate charging products use a DC to DC converter to boost the voltage going into the liftgate batteries. This allows the electric liftgate batteries to charge faster and more efficiently. Since the current has to travel a long distance from the truck to the liftgate batteries, the boost from the converter helps compensate for voltage drop.

[CLICK HERE TO FIND THE BEST SYSTEM FOR YOU!](#)

These systems:

- Make batteries and lift gate components last longer
- Charge liftgate batteries faster
- Reduce battery and maintenance costs over time
- Have easy-to-read LED indicator lights
