

JUST LIKE HOME, WHEREVER YOU ROAM.

Happy drivers *AND* happy fleets? You betcha'!

Invert™ Pure Sine Inverters with DynaBalance™

Give drivers the AC power they need to bring home conveniences into the cab while ensuring truck batteries are never too depleted to crank the engine.

Happy Drivers.

- Available in 1500 and 2000 watts
- Won't reset during tractor autostart events
- Easy-to-read battery status indicator
- Produces a pre-shutdown warning buzz
- Includes 3 AC power outlets
- Includes 2 USB charging ports

Happy Fleets.

- Keeps your freight moving
- Protects truck batteries
- Includes superior customer service
- Provides overload and short-circuit protection
- Includes 3-year warranty
- Custom harnesses available

To place an order, or for more information, call 1-800-219-1269

DynaBalance™ Monitoring Technology

Our pure sine wave inverters use patent-pending DynaBalance technology to balance the needs of the driver with the needs of the truck by estimating the battery state of charge, even under load, based on voltage and current rather than relying solely on voltage.

Inverter Controller

The controller includes a programmable LVD setpoint, fault detection, and available battery indication. It can be located remotely from the inverter, or mounted on the inverter itself.

ROI CALCULATOR

Assumptions

Road call frequency: 1 per year
Road call cost: \$1,000
Annual driver turnover: 94%
Cost to hire a new driver: \$2,243
Recruiting cost saved per year: 1%

Payback Period

1500 watt: 5 months
2000 watt: 6 months

5 year ROI (\$)

1500 watt: \$5,362.15
2000 watt: \$5,362.15

5 year ROI (%)

1500 watt: 1166%
2000 watt: 1050%
