

Provide Power & Convenience at the Trailer

The OneConnect™ with Interior Light Control connects power from the tractor to the trailer's electrical system and allows the driver to control the interior lights with the touch of a button.

Interior lights will automatically shut off when the truck is started or when the timer runs out, ensuring batteries are never depleted.

Available Configurations

- 7-Way
- 7-Way and Dual Pole
- Dual Pole
- Dual Pole and Single Pole
