Aware: Harness Length & Pairing Feature

Aware Harness Length

The Aware harness length has been changed from 6 inches to 20 inches in an effort to make installation of the product easier.

Aware Pairing Feature

In order to improve initial device pairing and re-connection behavior, the Aware pairing timeout has been changed from a 2-minute timeout to a 10-minute timeout. This means that after 10 minutes, the Aware will automatically power off. If pairing is not established in that time, reset the power to the Aware and try again.

Please contact Purkeys' Technical Services Department if you have any questions.
